

Delivering bespoke insight for your needs

Have you been grappling with data, unsure of how to apply it to the challenges at hand? Or lacking in comprehensive and coherent evidence to support your planning and delivery?

PHASE 1

Initiation and planning

PHASE 2

Specification and development

PHASE 3

Data collection

PHASE 4

Analysis

PHASE 5

Reporting and dissemination

If you're looking to understand provision, demand, capacity, or outcomes, we can work with you to provide comprehensive and coherent evidence to support both planning and delivery. Working in partnership with you, we will apply our tried, tested, and successful delivery cycle to provide a bespoke package for your needs.

The NHS Benchmarking Network supports its members to improve the quality of health and social care services through the use of relevant, high-value benchmarking services. In addition to our core work programme, we undertake a wide variety of bespoke projects, from national data collections to system-level support.

Whether it's connected to our core benchmarking programme, or a separate area of interest identified by you, we can help. The methodology and infrastructure are fully set up for a smooth and flexible process that fits your requirements.

Typically covering a period of 3-6 months, the process ensures we establish robust foundations with scoping and stakeholder identification, co-create and agree a fit-for-purpose data specification, undertake a focused data collection and validation phase, and deliver high quality reporting that will enable you to drive your work forward with conviction.

Our bespoke projects are constructed with you at the very centre, supported every step of the way by our expert Support Team. To accommodate the varying scale, scope, and complexity of projects, we will work with you to agree the most appropriate support package.

Reach out for a no-obligation quote or discussion.

Benchmarking Network

We are the definitive reference point for benchmarking publicly funded Health and Social Care services. We have 25 years experience of healthcare benchmarking and thousands of metrics covering service model, access, activity, workforce, finance, quality and outcomes.
